WORK EXPERIENCE

Freelance Software Engineer | Self-employed | Remote | Nov 2020 - Present

- Engineered and deployed innovative web applications for international clients, significantly enhancing user experiences across various markets.
- Spearheaded the development of Copay.au, a scalable AI-powered SaaS platform designed to disrupt asset-sharing in multiple industries.
- Led the creation of a comprehensive marketing page, ensuring SEO optimisation and efficient deployment strategies.
- Utilised a tech stack including Vue.js, Node.js, Supabase, Tailwind CSS, React, and Next.js to deliver high-quality software solutions.
- Contributed to the Vite App project, a competitive ride-sharing platform, by developing a user-friendly marketing landing page and streamlining the registration process.
- Initiated and modernised the administrative panel for Vite App, incorporating Vue.js and Vuetify, and managing the migration to Angular and Firebase.
- Played a key role in various small-scale projects and platform migrations, demonstrating versatility and a broad skill set in software engineering.
- Fostered continuous improvement and innovation in developing an online education platform, addressing the evolving needs of digital learning environments.

Frontend Engineer | Talktime.ae | Dubai, UAE | Mar 2024 - Present

- Optimised user interface and functionality for Talktime.ae hub, ensuring high performance and enhanced usability
- Collaborated with project managers and stakeholders to accurately gather and implement feature requirements
- Integrated stakeholder feedback to refine and improve project outcomes
- Led team meetings to maintain project alignment, track milestones, and facilitate communication
- Contributed to continuous improvement by proactively addressing and resolving usability issues

Software Engineer | Testapp.io | Dubai UAE | Mar 2021 - May 2023

- Collaborated in daily strategy meetings to plan for new feature development and application updates.
- Executed the implementation of cutting-edge features, contributing to the modernisation of the technology stack.
- Optimised web application performance, focusing on reducing load times and enhancing component reusability.
- Conducted thorough code reviews to ensure maintainability and adherence to best practices.

Software Engineer | Introcept Nepal | Kathmandu Nepal | Jul 2020 - Mar 2021

- Developed new features for Agentcis, a legacy CRM software, enhancing user experience and functionality.
- Led code refactoring efforts to improve system performance and maintainability.
- Successfully migrated the front-end of the CRM platform to a modern framework, optimising responsiveness and user interface.

Web developer | Aayulogic | Kathmandu | Aug 2018 - Jul 2020

- Spearheaded the development and implementation of key features and modules for RealHRSoft, focusing on enhancing enterprise HR management capabilities, including payroll and task management systems.
- Led the successful overhaul of Rojgari.com, significantly improving job portal functionality and user experience.
- Integrated cutting-edge technologies to advance system optimisation, resulting in a more efficient and robust web platform.
